Propelling Digital Evolution with Next Generation Cyber Security Platforms

About us

SECURWEAVE

- SecurWeave addresses the threat of advanced persistent malware.
- Conceived by industry veterans with decades of experience in building safety and security critical systems.
- Committed to building holistic security platforms catering to the never before seen demands of the evolving autonomous digital world.

SecurWeave's expertise in building security and safety critical systems coupled with our in-depth understanding of the evolving embedded world uniquely positions us to offer holistic security platforms that are futureproof.

Why Choose Us

- Advanced malware being crafted by state sponsored attackers and organized crime rings easily bypasses antivirus and other signature based detection technologies.
- Consequences of cyber attacks can be truly devastating in Industry 4.0, autonomous vehicles, embedded aerospace and military applications

Achievements

- Developed India's first indigenous security hypervisor
- Providing security for IIT-M's Open Source microprocessor, Shakti
- Advanced threat protection platform is Installed and validated in IIT-M labs
- Multiple patents filed in Indian Patent Office
- Partnered with Xscale accelerator and Dilabs
